

Frost Bite

Premium With CMA

SAFER Ice Melt

100% Encapsulated with active ingredients

Works at
temperatures
as low as -25
Degrees!

Fast Acting - Long Lasting

Less Harmful to
Concrete, Pavers
and Footwear

Safer to Handle

Easy Dispersion

Vegetation Friendly

DISTRIBUTED BY:

Frost Bite

Premium With CMA

Frost Bite premium performance ice melter is a proprietary formulation of calcium chloride, magnesium chloride, sodium chloride and CMA. The product is encapsulated with CMA to make a more environmentally benign de-icer. Frost Bite ice melter is proven to work at lower temperatures while working to preserve vegetation and plant life.

The coloration of Frost Bite Ice Melt ensures that the user does not over-apply or under-apply the product due to a lack of visibility. This ensures that the area is covered correctly, maximizing safety and preventing liability.

Because Frost Bite Premium is a blend that melts more effectively than most other products, less is needed to get the job done, meaning a greatly reduced environmental impact.

Because Frost Bite Premium is granulated to optimize melting power, there is less wasted material and no wasted time.

Granules that are too small will start melting quickly, but won't penetrate the ice layer to break it apart.

Large granules will often penetrate the ice layer, but won't dissolve efficiently to create a brine layer.

The consistent, medium-sized granules that are used in Frost Bite Ice Melt penetrate the ice surface and maximize ice separation, making the removal process as easy as possible.

Granules that are too small won't penetrate ice

Frost Bite uses consistent granules that optimize melting ability

Granules that are too large won't dissolve properly
